## CrystaLatch™ 1x8 PM Fiberoptic Switch

(Protected by U.S. patents 7224860, 6757101, 6577430 and pending patents)

## Product Description

The CL Series 1x8 PM fiber optical switch connects optical channels by redirecting an incoming optical signal into a selected output fiber. This is achieved using patented non-mechanical configurations and activated via an electrical control signal. Latching operation preserves the selected optical path after the drive signal has been removed. The all solid sate CL $1 \times 8$ fiberoptic PM switch features low insertion loss, high extinction ratio, high channel isolation, and extremely high reliability and repeatability. It is designed to meet the most demanding switching requirements of continuous operation without failure, longevity, operation under shock/ vibration environment and large temperature variations, and fast response time.

The switch also has build-in circulator and isolator functions.

Electronic driver is available for this series of switches.

## Performance Specifications

| CL Series 1x8 PM Switch | Min | Typical | Max | Unit |
| :---: | :---: | :---: | :---: | :---: |
| Operation Wavelength ${ }^{1}$ | 1520 | 1550 | 1580 | nm |
|  | 1295 | 1310 | 1325 |  |
| Insertion Loss ${ }^{2}$ |  | 1.3 | 2.5 | dB |
| Uniformity |  | 0.7 | 1.0 | dB |
| Extinction Ratio ${ }^{2}$ | 18 | 25 | 30 | dB |
| Cross Talk ${ }^{3}$ | 35 | 50 |  | dB |
| Switch Speed (Rise, Fall) | 5 | 50 | 200 | $\mu \mathrm{s}$ |
| Repetition Rate |  | 2K |  | Hz |
| Durability | $10^{11}$ |  |  | cycle |
| Polarization Mode Dispersion |  |  | 0.2 | ps |
| Return Loss ${ }^{2}$ | 50 |  |  | dB |
| Operating Temperature ${ }^{3}$ | -5 |  | 65 | ${ }^{\circ} \mathrm{C}$ |
| Optical Power Handling 4,5 |  | 300 |  | mW |
| Storage Temperature | -40 |  | 85 | ${ }^{\circ} \mathrm{C}$ |

| Solid-State Latching |  |
| :--- | :---: |
| Fiber Type | Corning PM Panda fiber |

Package Dimension $82.8 \mathrm{~L} \times 37.3 \mathrm{~W} \times 8.5 \mathrm{H} \quad \mathrm{mm}$

1. Agiltron can achieve same SPEC at $L$ band
2. Measured without connectors
3. $-40^{\circ} \mathrm{C}$ version is also available.
4. High power version available.
5. Continuous operation, for pulse operation call.

## Applications

- Optical Signal Routing
- Network Protection
- Burst Switching
- Configurable Add/ Drop
- Signal Monitoring
- Instrumentation

## Features

- High Speed
- Non-Mechanical
- High Reliability
- Fail-Safe Latching
- Low Insertion Loss
- Rugged
- Compact
- Cost Effective
- Direct Low Voltage Drive

## CrystaLatch ${ }^{\text {TM }}$ 1x8 PM Fiberoptic Switch

## Electrical Driving Information

Each switching point is actuated by applying a voltage pulse. Applying one polarity pulse, one light path will be connected and latched to the position. Applying a reversed polarity pulse, another light path will be connected and latched to the position after pulse removed.

| Parameter | Minimum | Typical | Maximum | Unit |
| :--- | :---: | :---: | :---: | :---: |
| Resistance (each group) | 15 | 18 | 22 | $\Omega$ |
| Switch Voltage | 2.25 | 2.5 | $2.75^{*}$ | V |
| Pulse Duration | 0.2 | 0.3 | 0.5 | ms |

*Over this value will damage the device
Driving kit with USB and TTL interfaces and Windows ${ }^{\top M}$ GUI is available. We also offer RS232 interface as an option - please contact Agiltron sales.
