

CrystaLatch™ PM 2x2 Solid-State Fiberoptic Switch

(Protected by U.S. patents 7224860, 6757101, 6577430 and pending patents)

Product Description

The CL Series PM 2x2 Solid State fiber optical switch connects optical channels by redirecting an incoming optical signal into a selected output fiber. This is achieved using patented non-mechanical configurations and activated via an electrical control signal. Latching operation preserves the selected optical path after the drive signal has been removed. The all solid state CL PM 2x2 fiberoptic switch features low insertion loss, high extinction ratio, high channel isolation, and extremely high reliability and repeatability. It is designed to meet the most demanding switching requirements of continuous operation without failure, longevity, operation under shock/vibration environment and large temperature variations, and fast response time.

The switch also has build-in Circulator and isolator functions. Electronic driver is available for this series of switches.

Performance Specifications

CL Series PM 2x2 Switch	Min	Typical	Max	Unit
Operation Wavelength ¹	1520	1550	1580	nm
	1295	1310	1325	nm
Insertion Loss ²		0.8	1.2	dB
Cross Talk ³	20	25		dB
Switch Speed (rise, fall)	5	50	200	μs
Repetition Rate		2K		Hz
Durability	10 ¹¹			cycle
Extinction ratio	18			dB
Return Loss	50	55		dB
Operating Temperature ⁵	0		70	°C
Optical Power Handling ⁴		300		mW
Storage Temperature	-40		85	°C
Fiber Type	Panda PM Fiber			
Package Dimension	67.3L x 8.5W x 8.5H			mm

1. Agiltron can achieve same SPEC at L band.
2. Measured without connectors.
3. Agiltron is able to take a special order with 40 dB Cross Talk.
4. High power version available.
5. -40°C version is also available.

Features

- Solid-State high speed
- Ultra-high reliability
- Fail-safe latching
- Low insertion loss
- Direct low voltage drive
- Compact
- Low cost

Applications

- Optical channel blocking
- Configurable Add/Drop
- System monitoring
- Instrumentation

CrystaLatch™ PM 2x2 Solid-State Fiberoptic Switch

Electrical Driving Information

The switch is actuated by applying a voltage pulse. Applying one polarity pulse, one light path will be connected and latched to the position. Applying a reversed polarity pulse, another light path will be connected and latched to the position after pulse removed.

Parameter	Minimum	Typical	Maximum	Unit
Drive Voltage	2.25	2.5	2.75*	V
Drive Current	110	140	195	mA
Pulse Duration	0.2	0.3	0.5	ms

*Over this value will damage the device.

Driving kit with USB and TTL interfaces and Windows™ GUI is available. We also offer RS232 interface as an option - please contact Agiltron sales.

CL 2x2 Switch

Optical Path	Pin 1	Pin 2
Input 1→Output 1	GND	2.5V Pulse
Input 2→Output 2	2.5V Pulse	GND
Input 1→Output 2	2.5V Pulse	GND
Input 2→Output 1	GND	2.5V Pulse

Mechanical Dimensions (mm)
