## Fiber-Fiber ${ }^{T M}$ Series of $1 \times N$ Fiber Optic Switch Module <br> (bidirectional)

(Protected by U.S. patents 7224860, 6757101, 6577430 and pending patents)

## Applications

- Optical Signal Routing
- Network Protection
- Wavelength Management
- Signal Monitoring
- Instrumentation

## Features

- Low Cost
- High Reliability
- Low Insertion Loss
- Broad Band
- Compact Design
- Low Power Switching

The Fiber-Fiber ${ }^{\text {TM }}$ Series $1 \times N$ Series optical fiber switch is based on patent pending self-groove alignment mechanism without the need for AR coating and lenses. It offers unparallel advantages of very low loss and cost, amicable to any fiber core size, and broad wavelength operation from $300 \mathrm{~nm}-2300 \mathrm{~nm}$. The 1 xN series optical fiber switch is compliant with the Telcordia 1209 and 1221 reliability standards. The driving circuit is embedded in the package and is connected to computer through RS232, USB or RJ45 interface.
The Fiber-Fiber ${ }^{\mathrm{TM}} 1 \times \mathrm{N}$ optical fiber switch is suitable for multiple channel signal monitoring and signal management. The switch is bidirectional. It is not designed to maintain optical connections after electrical power is removed.

## Specifications

| Parameter | Min | Typica | Max | Unit |
| :---: | :---: | :---: | :---: | :---: |
| Operation Wavelength | 400 |  | 1800 | nm |
| Insertion Loss ${ }^{[1]}$ |  | 0.6 | 1.5 | dB |
| Cross Talk | 50 |  |  | dB |
| Switch Speed (Rise, Fall) ${ }^{[2]}$ |  | 100 |  | ms |
| Durability | $10^{7}$ |  |  | cycle |
| Polarization Dependent Loss |  | 0.02 | 0.1 | dB |
| Wavelength Dependence Loss |  | 0.1 | 0.2 | dB |
| Return Loss ${ }^{[5]}$ | 45 |  |  | dB |
| Repeatability |  |  | 0.3 | dB |
| Power Consumption ${ }^{[3]}$ | 0.7 | 3.6 | 5 | W |
| Operating Temperature ${ }^{[4]}$ | -5 |  | 65 | ${ }^{\circ} \mathrm{C}$ |
| Optical Power Handling ${ }^{[6]}$ |  | 300 | $500{ }^{[6]}$ | mW |
| Storage Temperature | -40 |  | 85 | ${ }^{\circ} \mathrm{C}$ |
| Power supply |  | $110 \sim 220$ |  | VAC |
| Fiber Type | SMF-28 or 50/125um or 62.5/125um |  |  |  |
| Package Dimension | 2RU 19" Mount rack or similar |  |  |  |

Notes:
[1]. Measured without connectors
[2]. Switching between adjacent channels
[3]. Consume minimum power during sleep time
[4]. $-25^{\circ} \mathrm{C} \sim 75^{\circ} \mathrm{C}$ version is also available.
[5]. For SM. Larger core will reduce the value, index matching-fluid version increases the return loss
[6]. High power version available

## Module Mechanical Dimensions

2RU 19" mount rack typically. The input and output connectors are on the front panel, while the control interface and power supplier are on the rear panel.

[^0]
## Control Interface and Power Supply

- RS 232
- Ethernet $10 / 100$ with definable IP address
- USB
- GUI
- 110-220V (0.6 A) Power Input

## Typical Graphic User Interface

# Fiber-Fiber ${ }^{\text {TM }}$ Series of $1 \times N$ Fiber Optic Switch Module

## Questions and Answers

Q: If the device were to fail, would the switch continue to pass the fiber light through the switch as configured before failure? When power is restored, does the IN/OUT configuration before failure remain in place?
A: This depends, if one mirror fails, it only affects the light go through that mirror. Yes, when power back up it will go to the previous points

Q: When power is restored, does the IN/OUT configuration before failure remain in place?
A: Yes, when power back up it will go to the previous flightpath
Q: If power to the device were shutoff, would the device continue to pass the fiber light as configured before failure?
A: This function is call latching. We uniquely offer MEMS latching switch but cost more.
Q: With the Ethernet Control Option, does the switch support SNMPv3
A: Yes. This internet standard protocol allows user to write their own control code
Q: With the Ethernet Control Option, what type of encryption does the SNMPv3 use?
A: MD5/DES

Q: With the Ethernet Control Option, could this device be controlled by multiple users at different locations and all users will also see the configuration updates?
A: Yes
Q: With the Ethernet Control Option, could this switch be controlled by multiple users at different locations and all users will also see the configuration updates?
A: Yes

Q: With the Ethernet Control Option, does the user need to install any software on their computer other than a web browser?
A: No
